# SAVE YOU MONEY

A new home is a big investment.  
Why not invest in one that saves you money?

## Lower your energy costs

With a solar home, you generate your own clean, more affordable energy at a rate that's lower than the current utility price.

## Homes with solar may be worth more

Not only can you lower your energy costs, you can boost your home's value when you sell later. Berkeley Labs found homes with solar command more at resale than homes without.\*

## Lock-in lower rates for years to come

Traditional utility costs tend to rise every year. Solar power lets you lock in low, predictable rates. You can watch your savings grow over time.

## It's clean energy with no worries

SolarCity constantly monitors your system and guarantees that it's always working perfectly. We even cover necessary maintenance, repairs and insurance costs.

Get clean, more affordable energy

# HOW IT WORKS

# 1

**Panels** - Each solar panel converts sunlight into direct current (DC) electricity.

# 2

**Inverter** - The inverter converts direct current (DC) electricity into alternating current (AC) electricity. You are now producing your own power.

# 3

**Utility Meter** - The utility meter continually measures electricity consumed by your home.

# 4

**Utility Grid** - You are still connected to the grid so you can draw electricity when you need it.

# 5

**Monitoring** - You can check your system production at any time using mysolarcity.com or the MySolarCity smartphone app.

\*Lawrence Berkeley National Laboratory, April 2011, "An Analysis of the Effects of Residential Photovoltaic Energy Systems on Home Sales Prices in California." A solar power system is customized by SolarCity for your home, so pricing and savings vary based on location, system orientation, system size, government rebates and local utility rates. Anticipated savings based on a projected 4.8% annual increase in electricity rates. SolarCity financing, incentives, anticipated savings and other terms may vary and are not available in all locations. Savings on electricity costs are not guaranteed. SolarCity will repair or replace broken warranted components for the term of the SolarLease. Please carefully review the terms and conditions of the SolarLease, the SolarCity Production Guarantee, SolarCity's Limited Warranty, and the Solar Panel Maintenance Guide for complete details or visit us at [www.solarcity.com](http://www.solarcity.com).
